

Carbon Reduction Plan

1. Commitment to Achieving Net Zero

Worldspan Ltd is committed to achieving Net Zero emissions by 2050.

Note on Reporting Status

Worldspan Ltd is currently exempt from mandatory reporting under the Streamlined Energy and Carbon Reporting (SECR) framework, as its annual turnover is below the £36 million threshold. This Carbon Reduction Plan is provided on a voluntary basis to support our participation in procurement tenders and to align with our commitment to the Science Based Targets initiative (SBTi).

2. Baseline Emissions Footprint

Baseline Year: 2024

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. This baseline was used for our formal SBTi submission.

EMISSIONS	TOTAL (tCO2e)
Scope 1	0.941
Scope 2	11.05
Scope 3 (Included Sources)	Not recorded in baseline*
Total Emissions	11.99

*Note: 2024 was used as the baseline for energy (Scopes 1 & 2). Scope 3 data collection was expanded in 2025.

3. Current Emissions Reporting

Reporting Year: 2025

EMISSIONS	TOTAL (tCO2e)
Scope 1 (Natural Gas)	6.25
Scope 2 (Electricity)	5.23
Scope 3 (Included Sources)	45.66
Total Emissions	57.14

Scope 3 Breakdown & Methodology (2025):

- Business Travel: This total includes both internal business travel and travel associated with the delivery of client projects. Data was compiled using a combination of spend-

based analysis for corporate overheads and activity-based distance calculations for global project travel.

- Employee Commuting: 11.19 tCO₂e (Based on hybrid work policy and staff survey data).
- Waste, Upstream & Downstream Distribution: Quantification in progress. Worldspan Ltd recognises that more work is required to accurately capture and quantify these emissions. We are currently developing a more robust data-capture framework for these categories as part of our continuous improvement.

4. Emissions Reduction Targets

In October 2025, Worldspan Ltd received formal validation from the Science Based Targets initiative (SBTi) for the following targets:

Worldspan Ltd commits to reduce absolute scope 1 and scope 2 GHG emissions 63% by 2034 from a 2024 base year, and to measure and reduce its scope 3 emissions.

5. Carbon Reduction Projects

The following environmental management measures and projects have been completed or implemented since the 2024 baseline:

Formal SBTi Target Validation (approved October 2025).

Maintenance of BS EN ISO 14001: Environmental Management Systems certification since 2018.

Maintenance of BS ISO 20121: Sustainable Event Management certification since 2018.

Implementation of a granular Scope 3 tracking framework for internal and client-facing travel.

Maintenance of a hybrid working policy to reduce commuting-related emissions.

6. Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed on behalf of Worldspan Ltd:

Name: Jason Wilcock

Job Title: Chairman

Date: 13th May 2026
